PLENARY SESSION

Agrifood Priorities in the Regional, National and International Systems

The session will introduce policies and key actors at local, national and international level in the Agrifood system, with focus on the strategic role played by the collaborat thus highlighting further opportunities for bilateral collaboration.

11.30-13.30

PARALLEL SEMINARS (*):

Agrifood Research as Driver of Innovation: from the Local Smart Specialization to the International Dimension (in collaboration with CL.A.N. National Agrifood Clus

Agrifood, which is a key sector in Italy, has known an increasing expansion in China, due to an intense development in the Chinese food industry, to the dimension of the and thanks to the growing attention paid by consumers and authorities to issues such as nutrition and health, food safety, food quality, sustainable production,

The parallel Seminars will therefore explore the potential Sino-Italian cooperation opportunities along the following topics that have been identified as primary research a challenges in the food sector.

Seminar 1: Health and Wellbeing Throughout The Entire Life Cycle

Seminar 2: Food Safety

Seminar 3: Production Processes for Improved Food Quality

Seminar 4: Sustainable and Competitive Food Production

Seminar 5: Machines and Plants for the Food Industry

***proposed format:** Each Seminar shall be chaired by one Chinese and one Italian representative presenting relevant national expertise, initiatives and excellences on the 1 min each). The Chairs shall be identified among relevant experts from academia or industry. The two presentations will be followed by a discussion on possible joint proje initiatives of common interest (1 hour). The speakers will be introduced by a moderator who shall act also as rapporteur for the Seminar. The Seminars will be complemer and demo available on the venue.

9:30 - 15:30
